Assembling your magnetic popup counter

Everything you need to assemble your display is stored in these handy travel cases.

Take out the frame.

Stand the frame on the floor. By lifting the frame - expand the frame with the pins on the connectors facing up.

Take the magnetic bars out of the bag. Magnetic bars attach to the frame.

Add the four storage shelves.

The shelves stabilise the frame. Notches on shelves align to front right when placed in frame.

Add magnetic strips to the sides to support the graphic skirt.

Attach graphic skirt to frame - utilising the magnetic strips.

Place the table top across the frame to complete your popup counter. Holes on underside of top align with pins on frame.
